MONOGRAPHS AND PAPER COLLECTIONS ON PEACE EDUCATION

With a Focus on the Last 25 Years

Ake Bjerstedt

The present miniprint lists examples of monographs and collections of papers dealing with peace education. The major focus is on materials in English, German and the Scandinavian languages from the last 25 years.

Titles of publications are normally given in their original language. If the original language is English, French or German, no translations are provided. In the case of other original languages, a translation of the title into English is added in square brackets.

For those who are not familiar at all with this area, the fairly large number of references may be experienced as confusing. Therefore, an asterisk (*) has been used to mark a few publications as valuable for those who would like to get some introduction and review. These selections can to some extent be seen as arbitrary, in the sense that several other publications could have been chosen for the same purpose. Nevertheless, it is hoped that these notations may be felt as useful for some readers.
